Subject: AGAR Reporting

Hi Narelle,

I'm a PhD student working with Adam Irwin, I'm not sure if you're already aware of our PAEDS /GNSBI study, but due to the nature of the data we are collecting we are keen to contribute to the AGAR reporting, specifically Gram Negative Bacteria in paediatric patients. I think Adam was in contact with the committee previously. We have all the data for 2020. What I am wondering about is data formatting. Is there a pro-forma or database that you would require the data to be inputted to? I'm trying to prepare our data for potential submission.

Regards,
