**Subject:** RE: QLD Children's Participation

Dear Denise,

Thank you for your note. As I said to Kathy, including the data from the QLD Children's Hospital would be a valuable contribution.

I have spoken to Narelle and we will begin pulling their data for this year.

Kind regards,

Claire

Hi Claire

Thank you for your interest in AGAR.

QLD Children's Hospital was a participant in AGAR from Jan 2017- July 2020 so we would be pleased if you can re-join in 2022.

If you are able to join it would be great if you could retrospectively collect the data from Jan 1 2022.

I have attached the protocols for collection.

The data both demographic and vitek is uploaded onto the AGAR Web Portal and I have attached the manual.

Narelle George at RBWH will be a good resource for you.

**Regards,**

**Denise Daley, MASM**
