

2022 WHO GLASS UPDATE

Prepared for AGAR Executive Meeting 04 November 2022

The 2022 data call for WHO GLASS opened 30/06/2022

For 2021 data were collected from 434 sites surveillance sites and 101 laboratories across the country

2021 data from the AURA, APAS and AGSP data sets were prepared, collated and uploaded covering all 4 GLASS priority specimens and 8 priority pathogens.

For 2021 AST data on a total of 134 650 isolates were reported to the WHO GLASS from Australia.

For 2023 the WHO will announce the release of the GLASS 2 Manual and the data call is expected to be in the window June to October 2023
