Dear Geoff,

Jan has spoken to me her roles with both AURA and AGAR in data access and analyses and the importance of the collation and reporting of AGAR data being supported by access to uploaded AGAR data by participating laboratories.

I support the need for Jan to have access to the secure web portal maintained by Nexus6 for AGAR, which I understand you are also supportive. Previously concerns had related to privacy aspects due to potentially identifiable content, but that processes have been put in place so that there is no potential for identification to occur as Jan will not have access to the laboratories' patient management systems.

If you wish to progress these arrangements please go ahead and arrange with Nexus6 as part of your contract arrangements.

If I can assist in any other way please don't hesitate to let me know

Thanks

Kathy

The Australian Commission on Safety and Quality in Health Care acknowledges the traditional owners of country throughout Australia, and their continuing connection to land, sea and community. We pay our respects to them and their cultures, and to elders both past and present.
